

Ibrahim Ahmed Shaikh

Software Engineer

✉ ibrahimahmedshaikh02@gmail.com ☎ [+923052023045](tel:+923052023045) 📍 Karachi, Pakistan

Skills	C#	Javascript	.NET Framework	SQL	.NET Core
	Node.js	Entity Framework	ASP .NET MVC	Postgre SQL	MongoDB
Profiles	GitHub ibrahim-the-dev				
	LinkedIn Ibrahim Ahmed Shaikh				
Experience	Albiware				
	Software Engineer			Oak Brook, IL	
	November 2025 - Present				
	- Resolved 250+ support tickets in under 3 months — and counting — spanning high-priority bugs affecting clients across 250+ companies on the platform - Contributed to product development by building new features on the web app using C# .NET, Razor Pages, and Tailwind CSS - Led the early database design for a Floor Plan LiDAR Scan feature, including schema creation and migration of all existing records to the new structure - Worked across the full stack — API development, database migrations, frontend, and bug fixes — on a fast-moving product team https://albiware.com				
	NIFT Pakistan				
	Assistant Manager Software Developer			Karachi, Pakistan	
	December 2024 - November 2025				
	- Digital Cheque Service : Contributed to Pakistan’s first Digital Cheque solution, digitizing cheque processes and enabling end-to-end electronic cheque handling. Provided customers with options including deposit, issuance, validation (as issuer), acceptance (as beneficiary), and Positive Pay (pre-validation) — enhancing convenience, security, and modernizing cheque clearing. - Inward Clearing Portal : Developed an Inward Clearing Portal using NIFT ICL files, integrated with banks’ core banking systems for automated cheque posting and return marking — reducing manual errors and streamlining clearing operations. - Visual Verification Module : Built a Visual Verification module for validating cheques deposited via digital cheque services using .NET Core, Razor Pages, and SQL Server — ensuring accuracy, reducing fraud, and improving operational efficiency. https://nift.pk/				
	Nixaam				
	Software Engineer			Karachi, Pakistan	
	March 2024 - December 2024				
	- PACS Development: Developed a Picture Archiving and Communication System (PACS) incorporating HL7 messaging for orders, FHIR, DICOM receiving, retrieving, querying, and Modality Worklist (MWL). Utilized .NET Framework, Windows Service, .NET Core, PostgreSQL, and AWS S3 for storage.				

Layered Architecture & Facade Pattern for Radiology Portal APIs: Developed the backend (APIs) using layered architecture and facade design pattern. Utilized Dapper as the ORM with .NET Core and PostgreSQL for data access. The APIs were designed for a radiology portal (XRAD) with portals for radiologists, center technicians, and center branches.

- API Development: Created multiple APIs for various projects using .NET Core, PostgreSQL, SQL, and AWS S3 for storage.
- Travel Website Enhancement: Resolved critical issues in a .NET MVC-based travel website, utilizing Entity Framework and SQL. Successfully delivered the project in 1.5 months.
